

# PRIYANSHU SRIVASTAVA

Full Stack Developer | MERN Stack | React.js & Next.js | GenAI Integration  
Ghaziabad, Uttar Pradesh, India | +91 7006193940 | [privanshusrivastava318@gmail.com](mailto:privanshusrivastava318@gmail.com)  
[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

## PROFESSIONAL SUMMARY

Full Stack Developer with hands-on experience architecting and shipping production MERN-stack applications, including a live multi-vendor startup (U-Craft) that has onboarded 50+ real users. Skilled across the entire stack — REST API design, database schemas, responsive React interfaces, and AWS deployment — with proven experience integrating AI and machine learning models into 6 production projects. Ranked All India Rank 2051 in NCAT 2026 among 8,00,000+ participants nationwide. Seeking a full-stack or product engineering role where clean code, measurable impact, and continuous learning are valued.

## TECHNICAL SKILLS

- **Languages:** JavaScript (ES6+), TypeScript, Python, Java, SQL, C
- **Frontend:** React.js, Next.js, Redux, HTML5, CSS3, Tailwind CSS, Responsive Design, SPA, Accessibility
- **Backend:** Node.js, Express.js, RESTful API Design, GraphQL, JWT Authentication, OAuth 2.0
- **Databases:** MongoDB, PostgreSQL, MySQL, DBMS
- **DevOps / Cloud:** AWS (EC2, S3), Docker, Kubernetes, CI/CD (GitHub Actions), Firebase, Vercel, Git, GitHub
- **CS Fundamentals:** Data Structures & Algorithms, OOP, Operating Systems, System Design Basics
- **Tools:** Postman, Jest, Vite, Elasticsearch, Agile / Scrum, Debugging
- **Additional:** PHP, Laravel, Blade, MySQL/MariaDB

## PROFESSIONAL EXPERIENCE

### Web Development Intern (Laravel/PHP) | TripLodge Universe, Hotel Booking SaaS Platform

Jul 2026 – Present

- Configured a complete local development environment (XAMPP, MySQL/MariaDB, Composer, PHP) for an existing Laravel-based hotel management SaaS codebase, independently resolving port conflicts and service configuration issues.
- Diagnosed and resolved database migration and MySQL service conflicts, successfully importing and structuring the production schema locally.
- Designed and built admin panel modules, including Hotels, Users, Bookings, OTA Monitoring, Settlements, Reports, and Settings, using Laravel's MVC architecture (Routes, Controllers, Blade views) to match the existing design system and Tailwind CSS styling.
- Implemented search and filter functionality, status-based approval workflows, and paginated data tables, while debugging route conflicts, missing model dependencies, and view resolution errors using Laravel's stack traces and logs.
- Applied MERN-stack fundamentals — MVC patterns, REST conventions, and relational schema design — to ramp up quickly on Laravel and PHP, demonstrating adaptability across stacks beyond the core JavaScript ecosystem.

### Full Stack and GenAI Intern | ShapeMySkills by Ducat, Noida

Jul 2025 – Aug 2025

- Engineered 3 full-stack modules using React.js, Node.js, MongoDB, and GenAI APIs, reducing API response time by 30% through query optimization and response caching.
- Introduced build-pipeline checks that cut deployment debugging time by 35%, and automated Jest regression tests that saved approximately 4 QA hours per sprint.
- Extended HRMS modules with role-based access panels and attendance-tracking logic.

### Data Analyst Trainee | Skillrisers Infotech Pvt. Ltd., Ghaziabad

Jan 2024 – Feb 2024

- Migrated 4 spreadsheet-based reporting workflows to structured data pipelines, shrinking manual reporting time by 30% across 3 client projects with zero post-launch defects.
- Conducted client requirement gathering, market mapping, and internal product testing.

### Freelancer | Independent Contractor, Remote

Jan 2022 – Aug 2022

- Completed paid branding, design, and web development projects independently under tight deadlines, managing client requirements end-to-end prior to college.

## PROJECTS

### U-Craft — Artist Marketplace Startup [MERN] [Live](#) | [GitHub](#)

- Founded and launched a live multi-vendor e-commerce startup enabling personalized art ordering from independent creators, onboarding 50+ registered users and 10+ artists.

- Architected cart management, Razorpay checkout, real-time order tracking, and artist-buyer messaging on a reusable MERN foundation designed for multi-city expansion.
- Validated the business model through interviews with 30+ artists, uncovering core unemployment gaps that shaped the product roadmap.

#### Jobify — Personalized Job Tracker [MERN + AI] [Live](#) | [GitHub](#)

- Created a personalized job-application tracker featuring resume-to-job-description matching, a 100-point automated ATS scoring engine, and real-time status updates.
- Structured the matching engine and dashboard to help candidates prioritize applications and strengthen resume alignment against target roles.

#### INQUISITOR — AI-Powered SIEM Assistant [PERN + Elasticsearch + AI] [Live](#) | [GitHub](#)

- Developed a security log analysis tool processing 10,000+ daily entries via Elasticsearch with natural-language querying.
- Trimmed average incident response time by 30% through optimized query pipelines and indexed search.

#### BHARAT-Freelance — Freelance Marketplace [MERN] [Live](#) | [GitHub](#)

- Delivered a freelance platform with role-based JWT authentication, Razorpay escrow payments, and an ATS-style candidate ranking engine, lowering manual screening effort by 50%.
- Benchmarked the deployment stack to sustain 100+ daily requests with optimized performance.

#### LuminX — Low-Light Image Enhancement [MERN + Python ML] [Live](#) | [GitHub](#)

- Optimized a Python ML inference pipeline from 1–2 minutes to under 30 seconds, a 5x performance gain.
- Built a drag-and-drop React interface with real-time enhancement previews and smooth animations.

#### HairNet (HairCare-AI) — AI Hair Diagnosis Platform [MERN + ML] [Live](#) | [GitHub](#)

- Integrated a trained ML diagnostic model into a modular MERN backend, improving personalized hair-care recommendation accuracy by 70% over rule-based logic.

### LEADERSHIP

---

#### Vice President | Advitiya Cultural Society, IMS Engineering College, Ghaziabad

Jan 2026 – Jun 2026

- Promoted from Cultural Secretary to Vice President in the final year, overseeing society-wide strategy across 5 clubs and 50+ members.
- Directed budgeting, cross-club coordination, and event leadership for the society's flagship cultural fest.

#### Cultural Secretary | Advitiya Cultural Society, IMS Engineering College, Ghaziabad

Jan 2025 – Dec 2025

- Led a 50+ member cultural team, organizing 15+ large-scale campus events including technical fests and inter-college competitions.
- Coordinated across 5 clubs (dance, music, drama, photography, fine arts), managing budgets, timelines, and resource allocation.

### EDUCATION

---

#### B.Tech — Computer Science and Engineering | IMS Engineering College, Ghaziabad

2022 – 2026

- CGPA: 7.88 / 10.0 (Final) | Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Web Development

### CERTIFICATIONS

---

- 3 courses from Udemy — Complete React and NextJS Course with AI-Powered Projects (95.5 hours, Jul 2026), Data Structures & Algorithms in Java (150+ LeetCode Problems), and Full Stack Web Development
- AI for Business Essentials — HP LIFE (Jan 2026)
- 2 courses from Scaler — Docker and Kubernetes Fundamentals (Dec 2025) and React Masterclass (Dec 2025)

### ACHIEVEMENTS

---

- All India Rank 2051 — NCAT 2026, among 8,00,000+ participants nationwide.
- Winner — Ideathon 2025, Melange Tech Fest, for an innovative tech-driven solution.
- Top 10 Finalist — National Hackathon at COER Roorkee, among 105 competing teams.
- Hackathon Participant — GL Bajaj Institute of Technology & Management.
- Founder, U-Craft — scaled a student-led marketplace startup to 50+ users and 10+ onboarded artists.

### LANGUAGES

---

- English — Professional Working Proficiency | Hindi — Native / Bilingual Proficiency
